Capgemini is an Equal Opportunity Employer encouraging diversity in the workplace. All qualified applicants will receive consideration for employment without regard to race, national origin, gender identity/expression, age, religion, disability, sexual orientation, genetics, veteran status, marital status or any other characteristic protected by law.

This is a general description of the Duties, Responsibilities and Qualifications required for this position. Physical, mental, sensory or environmental demands may be referenced in an attempt to communicate the manner in which this position traditionally is performed. Whenever necessary to provide individuals with disabilities an equal employment opportunity, Capgemini will consider reasonable accommodations that might involve varying job requirements and/or changing the way this job is performed, provided that such accommodations do not pose an undue hardship.

Capgemini is committed to providing reasonable accommodations during our recruitment process. If you need assistance or accommodation, please reach out to your recruiting contact.

Applicants for employment in the US must have valid work authorization that does not now and/or will not in the future require sponsorship of a visa for employment authorization in the US by Capgemini.

Job description:

Business Analysts (BAs) support the deployment of flight operations tools and SW products to airlines in both the Americas and Europe regions. This includes the tool designed to handle all aspects of Network Scheduling, Operations Control, Crew Planning, Crew Management, and day-of-ops Crew Control in a single Flight Operations system and Flight Planning tool optimized on Fuel, Time or Cost to meet operational needs while ensuring overall safety and compliance.

KEY RESPONSIBILITIES:

This role is responsible for actively managing the technical activities required to enable implementation of these products in the ecosystem of our new customers. With a solid base of product, industry knowledge and global regulatory compliance, the BA must be able to articulate product positioning/capabilities to both business and technical users, identify technical issues of assigned customers to assure complete customer satisfaction and assure the timely delivery of complex implementations.

Required Skills:

- Must possess a bachelor's degree or equivalent training
- Must have at least 5 years of experience in Commercial Flight Operations as a pilot,

Aircraft Dispatcher (certified), Crew Planner or Electronic Flight Bag (EFB) Administrator
